## PROGRAMME DESCRIPTION

### • *The objective*

Finance programme has been taught in Lithuanian language for several years and is constantly updated based on recommendations of students and social partners to keep up with scientific and practical changes in finance. This programme is among the most popular Master programmes for the study candidates. The programme received positive evaluations from the international accreditation experts' team. Starting with 2015, the programme has been offering an opportunity for the best students to obtain a double degree from the University of Siena, Italy during the fourth (additional) semester. The principal objectives of the programme are as follows:

- Critically evaluate economic and financial theories and research methods, to provide sufficient knowledge needed for analysis of financial problems at a macroeconomic level and to make based decisions at the highest financial management level;
- Introduce to the role, development, aims and objectives of international financial institutions and financial markets in global;

- Provide theoretical and practical knowledge needed for improvement of budgetary system and taxation policy in the face of national and global economic changes;
- Provide scientific and methodical knowledge needed for independent organization's financial analysis and financial risks' assessment and management, while taking into account macro and micro environmental changes.

- ***Career opportunities***

The world's largest financial institutions, such as Western Union, AIG, the NASDAQ and many others one after another open their offices in Lithuania. Finance program graduates after successful completion of their studies in English have a competitive advantage in developing their careers.

- ***Access to further studies***

Vilnius University created opportunities for students interested in continuing their studies to proceed to doctoral studies, which are available in English language; the best of our graduates might be offered employment at the university.

## KEY LEARNING OUTCOMES

The graduates of the programme are prepared as highly qualified finance specialists, able to perform analytical and managerial work in financial institutions and financial units of other organizations.
