“Choosing Vilnius University was one of the best decisions of my life! I fell in love with the lectures and the professors’ approach to teaching: the studies were very interesting and after one semester, I felt that it was easier to concentrate on them. Moreover, the university staff is very nice and helpful: they are always ready to help you, no matter what kind of problems you have. I also really enjoyed the atmosphere in my group: we had both Lithuanian and international students from all over the world, so I learned a lot about other countries and cultures.

And Vilnius is an amazing city to live in: it quickly becomes your home and then you can’t imagine your life without coming back here. I highly recommend to study in VU: it is a place that will change your life!”

Course	Credits
5-8 semesters are studied in the chosen specializations:	
<b>Entrepreneurship and Business Management</b>	
Starting this year, the program specialization is attractive to students with ambitions to start their own business, develop a family business, and work in a small and medium-sized enterprise. The specialization develops students' entrepreneurial skills based on proven and globally recognized methodologies and models for entrepreneurship and new products development. The specialization has been prepared with prominent business professionals who will actively participate in the study process by conveying their best practices. The studies will help you gain knowledge and insights and management skills relevant to business practice and, through practice, develop skills in business creation, development and presentation of business ideas to investors.	
<b>Global Business and Analytics</b>	
This new specialization prepares highly qualified business management professionals with the ability to analytically evaluate, plan, organize and manage business processes in an international business environment. During this specialization, students learn how to analytically evaluate and analyze business cases, understand business creation and international development processes, develop business strategies, underlying projects and business plans. Students gain specific knowledge of the diversity of international markets and consumers' needs as well as develop their analytical assessment capabilities by analyzing examples of international business organizations. The specialization prepares highly demanded professionals for business companies who are familiar with business strategies and sales management as well as are capable to manage companies or their functional units. The specialization has been prepared with prominent business professionals who will actively participate in the study process by conveying their best practices.	
<b>Marketing and Global Business**</b>	
This specialisation is designed for students, who want to learn to analyse and manage marketing resources in a global business environment. They study Marketing Management, Retail Marketing and Management, International Advertising Business, and other similar courses. Students will know how to use a variety of contemporary communication tools, and learn to assess consumer needs by analysing examples from international businesses.	
* Programme structure may be changed due to improvements of studies.	
** It is planned to start a new study programme from September 1, 2020.
