

DESCRIPTION OF THE SUBJECT OF DOCTORAL STUDIES

The title of the subject	Field of science (branch) code	Faculty	Department
Theories and Researches of Financial Accounting	Management S 003	Faculty of Economics and Business Administration Kaunas faculty	Department of Accounting and Audit, FEBA Institute of Social Sciences and Applied Informatics KF

Form of implementation	Volume of the subject in credits	Form of implementation	Volume of the subject in credits
lectures		consultations	1
individual	6	seminars	

Annotation of the subject

The purpose of the subject, annotation

The aim of the subject is to provide doctoral students with knowledge and develop analytical skills in the fields of financial accounting theories, research and regulation. Students will understand the methodology, paradigms, development of theories of financial accounting theories, their applicability in research. The course is designed to analyse aspects of the implementation of financial accounting theories in various regulatory systems: in the private sector according to Business Accounting Standards (BAS), in the public sector according to Public Sector Accounting and Financial Reporting Standards and internationally according to International Accounting Standards / International Financial Reporting Standards (IAS / IFRS), the student will assess the impact of regulation on the information generated by financial accounting, its users, the economics and legal entities of various forms, categories and areas of activity. Students will be able to analyse and evaluate the dependence of chosen and disclosed by companies financial and non-financial information in a constantly changing business environment and the impact on decisions made by various stakeholders, to conduct research in the field of financial accounting, applying the accepted methodological framework.

The content (topics):

1. The concept of accounting theory. Development of accounting theories. Accounting as a science.
2. Methodology for creating and developing accounting theories. Accounting paradigms and research methodology in accounting.
3. Normative accounting theories. Disadvantages of traditional historical price accounting. Relationship between capital, profit concepts and valuation systems. Current purchase price system. Current exit price system. Current purchasing power accounting system. Advantages and disadvantages of theories.
3. Concept and composition of the conceptual system. Business accounting standards in Lithuania, regulation of main accounting elements. Accounting practice development (digitization, new areas of accounting). Tax accounting.
5. Regulation and evaluation of public sector accounting and financial reporting.
6. Politics and economics of accounting regulation. Approaches to the free market and the need for regulation. Theories of accounting regulation: Theory of Public Interest, Capture Theory, Theory of Economic Interest Groups. Accounting regulation as a political process. Consequences of economic accounting regulation.
7. Positive accounting theory. Origin and assumptions of Positive Accounting Theory, main hypotheses. Variety and means of accounting manipulations (profit management, profit smoothing, "taking a bath", creative accounting). Advantages and disadvantages of the theory.
8. Systems oriented theories in accounting. Legitimacy Theory, Stakeholder Theory. Significance and disclosure of social responsibility. Social and environmental accounting. Integrated reporting.
9. International Financial Reporting Standards, their application, significance and substance, tendencies.

Assessment

Exam (70%) and project (30%) based on the topics of financial accounting theories and its application, relying on the latest scientific publications, providing the generalisation and insights of the analysed topic. The volume of the paper is 25-30 pages.
