## EU DIPLOMA

Many businesses in Lithuania are self-taught, adapting to market conditions as they grow. However, without specific knowledge of business process management, their growth potential may be limited. This is why our Master's degree programme was created: to support businesses in achieving greater success by improving efficiency, reducing costs, and saving time while maintaining service quality and meeting stakeholder needs. As a Master's programme in Business Process Management, it also enhances academic competencies, equipping graduates for potential careers in academia.
