for students, from 70 Eur per month

GRADUATES WORK

Each year, the job market becomes increasingly dynamic. Skills that were essential yesterday may no longer be relevant today. However, Vilnius University's Economics and Finance study programme faces no risk of losing its relevance.

From my experience, I can confidently state that there is a constant demand for Finance and Data Analysis talent, particularly in investment management and banking. Fundamental and well-established financial knowledge never loses its importance. Meanwhile, the ever-growing volumes of data compel every market player to step up their game to maintain competitiveness.

The future of successful organizations depends on people, and the future of successful individuals is secured by forward-looking academic knowledge.

Tadas Peciukevičius

CFA, General Manager of SEB Investment Management
