Established in 1972, Euromonitor International is the world leader in strategic business research and analysis. In addition to our Head office in London, we have offices in 11 other countries with over 1,000 staff, and a further 800 contributing analysts in over 80 countries around the world. As an independent company and recognised innovator, consistently out-performing our peers, we were the UK Private Company of the Year 2013 and in 2014 won the Queen's Award for Enterprise.

DATA ANALYST –MATERNITY COVER

Overview of the role:

Data Analyst will be responsible for researching, updating, modelling, standardising and constantly expanding the database of Industrial statistics for key global economies to meet the needs and deadlines of the publications schedule.

Key Responsibilities:
- Collecting industry statistics (production, imports, exports, employment and other metrics by industry) from national and international statistics offices for key global economies
- Evaluating collected data for quality, accuracy and value of information
- Standardising
- Interpolating and extrapolating the data
- Contributing to optimisation of desk research methods and data collection standards

Required Skills
- Degree in Statistics, Econometrics, Mathematics, Business, Economics or similar field (can be final year student)
- High level of numeracy
- Good command of MS Excel
- Experience in MS Access and/or R an advantage
- Experience in desk research an advantage
- Interest in industrial/B2B international business trends an advantage
- Well-developed organisational skills, including prioritising, scheduling, multi-tasking
- Excellent attention to detail
- Ability to work under pressure to meet tight deadlines

In return, we offer an international, fast-growing, dynamic, and challenging working environment with genuine global career development opportunities, as well as competitive salary, benefits and excellent working conditions.
